Quarto

Quarto enables you to weave together content and executable code into a finished document. To learn more about Quarto see <https://quarto.org>.

Running Code

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

```
library(dplyr)
```

Attaching package: 'dplyr'

The following objects are masked from 'package:stats':

```
filter, lag
```

The following objects are masked from 'package:base':

```
intersect, setdiff, setequal, union
```

```
library(gt)
library(tableone)
library(kableExtra)
```

Attaching package: 'kableExtra'

The following object is masked from 'package:dplyr':

group_rows

```
devtools::load_all()
```

i Loading toolbox

Registered S3 method overwritten by 'webshot2':

```
method      from  
print.webshot webshot
```

format_table

Normal data

```
data <- dplyr::sample_n(iris, 10)

format_table(
  data = data,
  font_size = 20
)
```

Table 1: Test table 1
