Quarto

Quarto enables you to weave together content and executable code into a finished document. To learn more about Quarto see https://quarto.org.

Running Code

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

1 + 1

[1] 2

You can add options to executable code like this

```
data <- dplyr::sample_n(iris, 5)
devtools::load_all()</pre>
```

i Loading toolbox

```
format_table(
  data = data,
  format_out = "html",
  font_size = 25
)
```

Sepal.Length	Sepal.Width	Petal.Length	Petal.Width	Species
